

MERAB SAMKHARADZE

Full-Stack Developer — Angular · Node.js · NestJS · SQL

+995 598 487 787 | samkharadzemerab@gmail.com | [linkedin.com/in/merab-samkharadze-15301b131](https://www.linkedin.com/in/merab-samkharadze-15301b131) | Tbilisi, Georgia

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience shipping production web applications across the stack — Angular on the front end and Node.js on the back end. Built and maintained a high-traffic promotions platform serving 100k+ users, delivered production Node.js REST APIs, and developed full-stack side projects using NestJS and relational SQL databases. Strong TypeScript foundation shared across Angular and NestJS, with a proven ability to pick up new technologies quickly and deliver in fast-paced, deadline-driven teams. Motivated to grow as a Full-Stack Developer working with Node.js, NestJS, Angular, and MS SQL.

TECHNICAL SKILLS

Backend: Node.js, NestJS, RESTful API design & development, server-side application logic, JWT authentication & role-based authorization

Frontend: Angular (v14+), TypeScript, JavaScript (ES6+), RxJS, NgRx (state management), HTML5, CSS3, SCSS (BEM), Responsive Web Design, Flexbox, CSS Grid, SPA architecture

Databases: SQL, relational database design, query writing & optimization (PostgreSQL, MySQL); MS SQL Server / T-SQL (transferable relational skills)

Mobile (familiar): Android Studio (Android), Xcode (iOS) — via learning projects

Tools & Workflow: Git (feature branching, pull requests, code reviews), WebStorm / VS Code, npm / yarn, Agile teamwork

Additional: React.js, Next.js (SSR / SSG)

Soft Skills: Fast learner, analytical problem-solving, high sense of responsibility, strong independent and team work, attention to detail

WORK EXPERIENCE

Front-End / Full-Stack Developer — Crocobet

07/2025 – Present

Tbilisi, Georgia

- Built the Angular (v14+) front end for a promotions and campaigns platform with 100k+ active users, using TypeScript, RxJS, and NgRx to manage real-time campaign state across multiple views.
- Developed and integrated production REST APIs with Node.js to power campaign workflows, connecting front-end features to back-end services and data.
- Delivered 20+ promotional campaign UIs end-to-end within a dedicated Promotions team — from design handoff to production — consistently meeting marketing launch deadlines.
- Created 50+ responsive UI components (SCSS BEM, Flexbox, CSS Grid) with full cross-browser compatibility, translating design mock-ups into production-ready code.
- Improved performance by applying lazy loading and OnPush change detection across 5 key modules, reducing initial page load time; maintained a clean, release-ready codebase in a 5-person team through code reviews.

Front-End / Full-Stack Developer — Adaptcore

09/2024 – 04/2025

Tbilisi, Georgia

- Led front-end development of a hotel and restaurant management platform (bookings, menus, orders, admin dashboards) used by 3+ hospitality businesses — built with Angular, TypeScript, RxJS, and SCSS.
- Built and integrated 10+ RESTful API endpoints together with the backend, enabling core workflows including real-time booking updates and role-based admin controls.
- Reduced page load times by 25% by optimizing Angular change detection and refactoring inefficient component trees.
- Cut post-release bug count by 15% by introducing structured debugging practices and mandatory code reviews before every merge to main.
- Ran bi-weekly knowledge-sharing sessions for a team of 4 developers, shortening average feature delivery time.

PROJECTS

Full-Stack Application — Angular + NestJS + SQL *(personal project)*

- Built an end-to-end application with an **Angular** front end and a **NestJS (Node.js)** REST API back end, applying modular architecture, dependency injection, and DTO-based request validation.
- Designed a relational **SQL** schema and wrote optimized queries (joins, indexing) on PostgreSQL / MySQL for CRUD and reporting operations.
- Implemented **JWT authentication** and role-based authorization for secure access control.

Full-Stack Projects — React / Next.js *(3 projects)*

- Built 3 full-stack projects with component-based architecture, server-side rendering (SSR), and static site generation (SSG); improved page performance by 30% through state-management and data-fetching optimization.

Mobile (Learning) — Android Studio / Xcode

- Explored native mobile app development with Android Studio (Android) and Xcode (iOS) through small learning projects.

EDUCATION & TRAINING

React with Next.js Framework — TBC IT Academy, Tbilisi | 09/2024 – 01/2025

JavaScript & Node.js (Advanced) — Academy of Digital Industries, Tbilisi | 05/2024 – 08/2024

- 80+ hours of advanced JavaScript (ES6+): closures, async/await, Promises, prototypes, OOP — foundation for Node.js back-end development.

Master's Degree – International Economics — Tbilisi State University | 09/2021 – 06/2023

Bachelor's Degree – Economics — Tbilisi State University | 09/2016 – 06/2021

LANGUAGES

Georgian — Native | **English** — Professional working proficiency

WHY ME

Fast learner: Became productive in Angular within months and expanded into Node.js, NestJS, and SQL — exactly the ability to quickly adopt new technologies that this role values over years of formal experience.

Full-stack range: Comfortable across the stack — Angular front end, Node.js / NestJS back end, and relational SQL databases.

Responsible & independent: Delivered production features on schedule, both independently and as a reliable team member, with careful testing before every release.
